## Chemistry

Recap

Avogadro's Constant ( $N_A$ )

1 mol =  $6.022 \times 10^{23}$   
particles

Amount of  
substance

Base SI Unit (1 of 7)

Unit: mol

# Moles

Relative Formula Mass  
( $M_r$ ): All RAM's in a  
formula combined

Mass of an atom of an element  
compared to carbon-12

# Relative Atomic Mass ( $A_r$ )

Mass (in g) of one mol of a  
substance

Mass number ( $A$ ) on PT

amount of  
substance

number of moles =  
mass

---

$A_r$  OR  $M_r$

# Worked Examples

Formula  
Insert Values  
Eine Tune  
Answer

Calculate the number of oxygen atoms in 0.5 mol of oxygen molecules,  $O_2$ .

$6.022 \times 10^{23}$  atoms in a mol

$$(3.011 \times 10^{23}) \times 2 = 6.022 \times 10^{23}$$

Calculate the mass of 0.10 mol of iron.

A<sub>r</sub> of iron = 56

FIFA

$$\text{mol} = \text{mass} / A_r$$

$$\begin{array}{l} \times 56 \quad 0.1 = \text{mass} / 56 \\ \quad \quad \quad \searrow \quad \quad \quad \nearrow \\ \quad \quad 0.1 \times 56 = \text{mass} \end{array}$$

$$0.1 \times 56 = \boxed{5.6 \text{ g}}$$

Calculate the amount of water molecules in 36 g of water.

FIFA

M<sub>r</sub> of water = 18

$$\text{A}_r \text{ of H} = 1$$

$$\text{M}_r \text{ of H}_2 = 1 \times 2 = 2$$

$$\text{A}_r \text{ of O} = 16$$

$$\text{M}_r \text{ of 1 O} = 16 \times 1 = 16$$

$$\text{M}_r \text{ of H}_2\text{O} = 18$$

$$\text{mol} = m / \text{M}_r$$

$$2 = 36 / 18$$

2 mol

In the reaction shown by the equation below, what mass of nitrogen,  $N_2$ , is needed to make 120 g of nitrogen monoxide, NO?

M $\square$  of NO = 30 and M $\square$  of  $N_2$  = 28 <sup>START with NO</sup>

FIFA

mole ratio

{ : 1 : 2

$$\text{mol} = m / M\square$$

$$4 = 120 / 30$$

$$\text{Scale up ratio} = 1:1:2 = 2:2:4$$

$$2 = ? / 28$$

$$? = 2 \times 28$$

$$56 = 2 \times 28$$

56 g

# How to answer reacting masses questions

1. Write the mole equation
2. Insert values for substance with two values (e.g. 12 g and 65 M $\square$ )  
REMEMBER: You may have to find or calculate a relative mass
3. Calculate moles
4. Find mole ratio for equation
5. Adjust ratio to fit mole value
6. Insert values for answer into mole equation
7. Calculate answer  
REMEMBER: Write units

# Practice Questions

Practice questions are available  
on the Online Quizzing System  
(OQS) under the title: Online RA  
Session #01 - Chemistry
